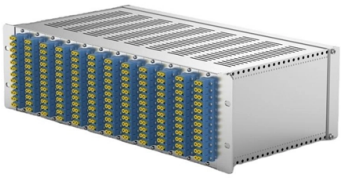
# Price of fireproof aluminum alloy cable trays in Nepal



## Overview

If you are looking for Aluminium Perforated Cable Tray Suppliers in Nepal, although we operate from Kolkata, we are prepared with trays of high standards.

## Key Takeaways

The price of fire-resistant aluminum alloy cable trays in Nepal varies widely depending on size, customization, and supplier, typically ranging from $1. 80 to $5 per meter for standard models, with higher costs for specialized fire-resistant or custom designs. OverviewFire-resistant aluminum alloy cable trays are lightweight, corrosion-resistant, and designed to prevent cable overheating, making them suitable for industrial, commercial, and high-risk facilities such as hospitals, data centers, and power plants.

Aluminum's high thermal conductivity and resistance to fire and toxic gas emissions enhance safety in critical installations.

### Factors Affecting Price

Material and Fire Resistance: Trays made from high-grade aluminum alloys with fire-resistant coatings or powder coating are more expensive than standard aluminum trays. Size and Load Capacity: Wider or higher-load trays cost more due to additional material and structural reinforcement. Customization: Custom lengths, perforations, or ladder-type designs increase the price.

Suppliers often provide tailored solutions based on project requirements. Supplier and Import Costs: In Nepal, prices are influenced by import duties, shipping, and local distributor margins. International suppliers may quote in USD, and local conversion plus taxes can raise the final cost.

### Estimated Price Range

Standard aluminum cable trays: Approximately $1. 80–$3 per meter for basic models. Fire-resistant or powder-coated trays: Around $3–$5 per meter, depending on thickness, coating, and fire rating.

Custom or heavy-duty trays: Prices can exceed $5 per meter, especially for high-load or specialized designs.

### Procurement Tips

Request Material Test Certificates (MTCs) to ensure fire resistance and compliance with international standards. Evaluate total cost of ownership: A slightly higher-priced aluminum tray may offer better durability and lower maintenance than cheaper steel alternatives. Check local suppliers: Some Nepal-based distributors may stock standard aluminum trays, reducing shipping costs and lead times.

Consider bulk orders: Larger quantities often reduce per-meter costs. In summary, while exact prices in Nepal depend on supplier, size, and customization, fire-resistant aluminum alloy cable trays generally cost between $1. 80 and $5 per meter, with higher-end or custom solutions priced above this range.
