American Flame-Retardant Standard Optical Cable Manufacturer

Overview

We carry RHW-2 and RW90-Two-Hour Fire cables as well as Two-Hour Horizontal and One-Hour Vertical Cables. We also carry QFCI Fire Resistant Fiber Optic Cables for communications.

Key Takeaways

Corning and CommScope are leading American manufacturers of flame-retardant optical cables, offering UL- and NEC-compliant solutions for commercial and life-safety applications. Key Manufacturers1. Corning Optical Communications Corning is a major U.

S.-based manufacturer of flame-retardant optical fiber cables, particularly for indoor applications. Their cables comply with the National Electric Code (NEC 2023) and are certified by Nationally Recognized Testing Laboratories (NRTL) such as Intertek Testing Services ETL Semko (ITS) to ensure safety and performance standards are met. Corning offers Plenum (OFNP) and Riser (OFNR) rated cables, which are chemically engineered to self-extinguish and produce low smoke, making them ideal for universities, corporate offices, and commercial buildings.

2.

Comm

Scope Comm

Scope manufactures a wide range of fiber optic cables, including fire-rated indoor/outdoor and low smoke zero halogen (LSZH) cables. Their products are designed for data centers, structured cabling, and high-density fiber trunk installations, with advanced fire-retardant materials to prevent fire propagation. CommScope's cables are suitable for environments requiring CPR-only flame ratings and are widely used in hyperscale data centers and colocation facilities.

3. Prysmian Group (U. S. operations) While Prysmian is a global company, its U.

S. operations provide Lifeline® fire-resistive cables that are UL-certified and CSA-compliant. These cables are designed for circuit integrity (CI) applications, maintaining operation during fire exposure, and are used in emergency systems, tunnels, and critical infrastructure.

Flame-

Retardant Ratings and ApplicationsOFNR (Riser): Stops fire from spreading between floors; used in office buildings and hotels.

OFN

P (Plenum): Suitable for HVAC return air spaces; self-extinguishing with low smoke.

LSZ

H (Low Smoke Zero Halogen): Reduces toxic fumes in confined spaces. Circuit Integrity (CI/IEC 60331): Maintains signal transmission during fire; used in fire alarms, emergency lighting, and tunnel ventilation systems.

Summary

For American flame-retardant optical cables, Corning is the gold standard for indoor plenum and riser applications, CommScope excels in data center and structured cabling solutions, and Prysmian provides specialized fire-resistive cables for critical life-safety systems. All these manufacturers ensure compliance with UL, NEC, and NFPA standards, making them reliable choices for safety-critical installations.

Corning Optical Communications manufactures quality flame retardant optical fiber cables for indoor applications, which comply with the requirements of the National Electric Code® (NEC® 2023)

QFCI Fiber Cable | Lifeline® MC Cable | Fire Rated Cables

We carry RHW-2 and RW90-Two-Hour Fire cables as well as Two-Hour Horizontal and One-Hour Vertical Cables. We also carry QFCI Fire Resistant Fiber Optic Cables for communications.

Top 5 Fire Resistant Fiber Optic Cable Manufacturers | 2026 Guide

In this guide, we list the Top 5 Global Manufacturers who set the standard for fire safety. We will also clarify the confusing jargon (OFNR vs. OFNP vs. IEC 60331) and show you how to source safety

Flame-retardant optical cable

Find your flame-retardant optical cable easily amongst the 50 products from the leading brands (Liebherr, AMOT, HS, ...) on DirectIndustry, the industry

Flame Resistant Electric Cables Manufacturers and Suppliers

Manufacturer of standard and custom grounding, static, control, fiber optic, low voltage, and armored cables. Features include flexible, flame, corrosion, chemical, heat, moisture, and weather resistance.

Flame Retardant Fiber Manufacturers and Suppliers in the

Manufacturer of standard & custom optical fibers including harsh environment optical fibers & near infrared (NIR) transmitting optical fibers. Available as raw glass or plastic fibers.

InFire Rated Cable Manufacturers | Incab America LLC

An isolated fire can develop into a large fire due to the rapid flame spread along cable communications. Our InFire Rated cables are designed to mitigate that risk and increase safety along the cables.

Top Fire Retardant Cable Manufacturers in United States

Our latest report provides details about the market size of Fire Retardant Flexible Cable, in volume (K Meter) and value (Million US$), market share and growth trend of each type in 2019 and

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

Indoor Fiber Optic Cables | Flame Retardant Indoor Cable Products

Indoor riser-rated cable jackets are held to a lower standard than plenum cables. The specially formulated, flame-retardant outer cable jacket and rugged construction of these cables facilitates

Fire-Resistant Cable

For critical communication lines flame-retardant properties of the cables are required to ensure normal signal transmission in emergency situations. An isolated fire can develop into a large fire due to the

Flame Retardant Fire Resistant Optical Cable Market 2025-2032

MARKET CHALLENGES Standardization Gaps Create Implementation Hurdles The absence of universally accepted testing protocols and performance standards for flame-retardant

Fibre Optic Cables Manufacturer | High-Capacity, Low Lead Time

Source fibre optic cables from APAR with large plant capacity, automated testing, ILAC MRA lab and expert teams for reliable, on-time B2B supply.

InFire Rated Cable Manufacturers | Incab America LLC

InFire Rated Dielectric InFire Rated Dielectric Light InFire Rated Outdoor The increasing number of fires leads to more and more stringent requirements in terms of optical cable fire safety. For critical

IEC 60332 Flame Retardant Cable Best Standards |Testing,

Learn about IEC 60332, the international standard for flame retardant cable testing. Understand its types, importance, and how it ensures fire safety in electrical installations.

Fire resistant optic fibre cable_V4

OPTIC FIBRE CABLES In case of fire, the communication networks, emergency systems and other key equipment''s are essential to stay functional. APAR has developed Fire Resistant (Fire Survival) Fibre

Top Fire Retardant Cable Manufacturers in United States

The United States fire retardant flexible cable market was around USD 526.32 million in 2018 and is expected to reach approximately USD 656.16 million by 2025, at a CAGR of around

QFCI Fiber Cable | Lifeline® MC Cable | Fire Rated Cables

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

Lifeline® MC Cable is exclusively stocked by Priority Wire & Cable. We carry RHW-2 and RW90-Two-Hour Fire cables as well as Two-Hour Horizontal and One-Hour Vertical Cables. We also carry

Low-Smoke Zero-Halogen Cables

Low-Smoke Zero-Halogen (LSZH) cables are engineered to enhance safety in environments where fire hazards are a concern. These cables produce minimal smoke and halogen-free emissions when
