Are color steel cable trays expensive

Overview

The Cost of Cable Trays vs. Other Cable Management SolutionThis blog post dives deep into the cost considerations of cable trays compared to other commonly.

Key Takeaways

Color steel cable trays typically range from $15 to $50 per meter, depending on material, size, and finish.

Overview

Color steel cable trays are made from pre-galvanized or powder-coated steel, offering corrosion resistance and aesthetic appeal for indoor and outdoor installations. They are commonly used in industrial, commercial, and data center environments for organizing power, data, and communication cables.

Price Range

Standard pre-galvanized or powder-coated steel trays: Approximately $15–$25 per meter for basic ladder or perforated tray designs. Heavy-duty or larger trays: Can cost $30–$50 per meter, especially for wider trays or those designed to carry high cable loads. Stainless steel or specialized coatings: Prices may exceed $50 per meter, depending on corrosion resistance and compliance with standards like CSA, UL, or NEMA.

Factors Affecting Price

Material Type: Pre-galvanized, hot-dip galvanized, or stainless steel affects durability and cost. Stainless steel is the most expensive due to corrosion resistance. Tray Design: Ladder, wire mesh, or basket-style trays vary in manufacturing complexity and price.

Wire mesh trays are generally more affordable than heavy-duty ladder trays. Size and Load Capacity: Wider trays or those rated for heavier cable loads cost more. Length and Accessories: Longer sections, bends, tees, and supports increase total cost.

Supplier and Brand: Prices vary between suppliers like RS PRO, CEF, and MP Husky, and bulk orders may reduce per-meter cost.

Purchasing Tips

Compare material and coating options to balance cost and durability. Check compliance with standards (e.g., DIN EN 61537, UL, CSA) for safety and reliability. Consider bulk purchasing to reduce unit cost.

Include installation accessories like brackets, supports, and covers in your budget. By considering these factors, you can select a color steel cable tray that meets both your budget and performance requirements.
