Armenia s Fiber Optic Communication Industry Ranking

Overview

Fiber accounts for over 83% of fixed broadband connections in Armenia as of early 2024, with DSL rapidly shrinking. Armenia ended ArmenTel's monopoly around 2005–2007, opening Armenia's internet market to new ISPs and mobile operators. In 2013, Armenia removed the licensing regime for ISPs, allowing any company to provide internet after notifying the Public Services Regulatory Commission (PSRC). By 2022, more. This report provides an analysis of Omdia's Fiber Development Index (FDI). The FDI quantifies and ranks the level of investment in fiber optical networks across nine metrics on a country-level basis. This analysis helps industry stakeholders, including policymakers, regulators, service providers. Ucom https://www. am/ Mobile connection. Telecommunications in Armenia involves the availability and use of electronic devices and services, such as the telephone, television, radio or computer, for the purpose of communication.
