Basic Dimensions of PZ30 Distribution Box

Overview

PZ30 low voltage distribution box features modular design for residential and commercial power distribution.

Key Takeaways

The PZ30 Distribution Box is a 9mm modular low-voltage distribution box suitable for single-phase or three-phase circuits.

Modular Size and Configuration

The PZ30 is designed as a 9mm modular distribution box, meaning each module occupies 9mm of width on the DIN rail, allowing flexible configuration depending on the number of circuits required. It supports single-phase three-wire or three-phase five-wire circuits with rated voltages up to 500V and load currents up to 100A.

Material and Construction

The box is made from high-quality steel plates (typically 1. 0mm thick) with high-voltage electrostatic powder coating for corrosion resistance and durability. The face cover is often transparent plastic, and the shell includes knock-out holes for convenient cable entry.

External fasteners are stainless steel, and sealing components are silicone rubber, providing resistance to oil, acids, alkalis, high temperatures, and aging. Installation TypesPZ30 boxes are available in exposed (surface-mounted) and concealed (flush-mounted) installation types. Multiple entry orientations are provided to accommodate different wiring requirements.

Practical Note on DimensionsWhile the modular width is 9mm per unit, the overall height, width, and depth depend on the number of modules and the specific model configuration. For precise measurements, it is recommended to consult the manufacturer's datasheet or contact suppliers such as Warom, Enecell, Lvma Electric, or Zhejiang Dexuan Technology.

Summary

Modular width: 9mm per moduleRated voltage: ≤500VRated current: ≤100AMaterial: 1. 0mm steel plate with powder coatingInstallation: Surface-mounted or flush-mountedProtection: Overload, short circuit, leakage For exact height, width, and depth, refer to the product datasheet or supplier specifications to match your installation requirements.

PZ30 Low Voltage Distribution Box – Modular

PZ30 low voltage distribution box features modular design for residential and commercial power distribution. Compact, safe, and easy to install with DIN rail

PZ30 Plastic Distribution Box Surface/Flush Mount | LVMA

Built with high-quality ABS plastic, these boxes are available in both surface-mount and flush-mount versions, with a range of sizes from 2-way to 36-way to suit different distribution needs.

Get Your Ultimate PZ30 Circuit Box Drawing

This downloadable package includes all the precise details you need: overall box dimensions, DIN rail placement, knockout locations for cable entry, and the front cover assembly.

PZ30 lighting distribution box|FULE ELECTRIC CO., LTD.

PZ30 distribution box is a terminal combination electrical distribution box, suitable for various types of residential buildings, high-rise buildings, hotel buildings, shopping malls, hospitals, industrial and

PZ30 Distribution Box

PZ30 lighting distribution box is suitable for frequency 50HZ, rated voltage 500V and below, load current is not greater than 100A single-phase and three-phase circuits, for power and lighting, motor control,

PZ30 distribution box

The internal structure is galvanized and has certain anticorrosive capability. The box below can be set into the line of the knock off holes, convenient wiring. The internal electrical components are all with

Pz30 Electrical Distribution Box for Residential/Industrial Use

1.This PZ30 distribution box is a low-voltage indoor power distribution enclosure, widely used for household, residential building and commercial wiring system.

Model Pz30 Metal Box Electrical Metal Power Distribution Box

PZ30 Luxury series light distribution box is the terminal distribution box of modular electrical equipment. The product is divided into open wall mounted, concealed embedded, single row, double row and

Understanding the PZ30 Lighting Distribution Box: A

This comprehensive guide is intended to shed light on the various aspects of the PZ30 distribution box, including its design, components,

Everything You Need to Know About the PZ30 Power Distribution Box

The PZ30 power distribution box is a key electrical component for safe and efficient power management. It offers a modular, durable design, ideal for residential, commercial, and industrial use. Compatible

Pz30 Electric Switchbox Distribution Box

Introduction: 1. PZ30 distribution box is divided to two types, respectively, fold type and unfold type, which is suitable to AC 50HZ, rated voltage 220v or 380v, rated current 100A or lower

Get Your Ultimate PZ30 Circuit Box Drawing

Our PZ30 Circuit Box drawing is the essential resource you need. This professional CAD file provides the complete design and layout specifications for one of the most common types of low

PZ30 Distribution Boxes

The distribution box PZ30 is a critical component in modern electrical systems, widely used for safe and efficient power distribution in both residential and commercial environments. Known for its modular

Infraswin Energy | News

Infraswin Energy debuts at 2026 IEEE Show, UL891 and UL508A cabinets draw North American attention From May 5 to 7, 2026, Shanghai Infraswin Energy Co., Ltd. participated in the
