Cable tray pipe fixing device

Overview

Direct fixing: gas guns and other direct fixing elements to quickly, easily and effectively anchor elements such as clamps or perforated tapes. Beam fixings: clamps and clips for fixing. Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. These are very versatile assembly systems which allow complex assemblies to be carried out in a quick, easy, durable way. They allow the installation and assembly of load bearing or suspended structures, those attached directly to the wall, or to tracks for the attachment of clamps and/or other. Access all Metaksan product catalogues, including cable management systems, pipe fixing catalogues, cable trays, ladders, trunkings, and accessories – directly from this page. These tray systems allow excellent ventilation and prevent sagging while routing.
