Cable tray suspension device price

Overview

Cable Suspension Kits & Accessories | City Electric SupplyCity Electric Supply offers a variety of cable suspension kits and accessories, providing efficie.

Key Takeaways

Cable tray suspension devices typically range from $10 to $150 per unit, depending on type, material, and load capacity.

Price Overview

Cable tray suspension devices include hanging stems, ceiling brackets, trapeze supports, and suspension kits. Prices vary based on design, material, and load rating: Basic suspension kits (threaded rods with clips or brackets) generally cost $10–$30 per kit for light to medium loads, suitable for small cable trays or short spans. Heavy-duty ceiling or runway kits with steel brackets, J-bolts, and threaded rods for industrial or data center applications can range from $50–$150 per kit.

Adjustable or tool-free suspension systems (like Griplock or Gripple kits) designed for quick installation and height adjustment typically cost $40–$120 per suspension point, offering labor savings and flexibility.

Factors Affecting Price

Material: Steel, zinc-plated, or stainless steel components increase durability and cost. Load Capacity: Kits rated for heavier cable trays or multiple trays are more expensive. Installation Features: Tool-free or pre-engineered kits reduce labor but may have higher upfront costs.

Length and Profile: Longer rods, trapeze brackets, or multi-perforated stems for adjustable height add to the price.

Buying Tips

For commercial or industrial projects, consider pre-engineered kits that include all necessary hardware for ceiling or wall mounting. For data centers or structured cabling, adjustable grippers or inverted “Y” suspension systems provide flexibility and faster installation. Always check load ratings and compatibility with your cable tray type (ladder, wire mesh, or solid-bottom) to ensure safety and compliance with electrical standards.

By selecting the appropriate type and material, you can balance cost, installation efficiency, and long-term reliability for your cable management system.
