Complete List of Cable Tray Models in Factories

Overview

Product Catalogue Cable Management SolutionsABB delivers the complete, versatile solution for cable management, with straight sections, fittings, and cover.

Key Takeaways

Factory cable tray systems include ladder, perforated, solid-bottom, wire mesh, and channel trays, available in steel, stainless steel, and aluminum, with multiple sizes and accessories for industrial applications. Main Cable Tray Types1.

Ladder Cable Tray

Features two side rails connected by transverse rungs, resembling a ladder. Ideal for heavy-duty industrial environments where cables are exposed to mechanical stress. Provides excellent ventilation and heat dissipation.

Commonly used in factories, data centers, and renewable energy plants. 2.

Perforated Cable Tray

Tray bottom has holes for air circulation, reducing overheating risk. Suitable for medium-weight cables and complex installations. Often used in industrial plants and data centers.

3.

Solid-

Bottom (Closed) Cable TrayFully enclosed bottom for maximum cable protection. Ideal for environments requiring cable isolation from dust, moisture, or chemicals. Common in chemical plants or areas with sensitive instrumentation.

4. Wire Mesh (Basket) Cable TrayConstructed from welded steel wires forming an open mesh. Lightweight, flexible, and easy to install or modify.

Best for low-voltage, telecommunication, and fiber optic cables, often in short-span applications. 5. Channel Cable TrayU-shaped or channel-like structure for light cable loads.

Compact and cost-effective, suitable for tight spaces or short cable runs.

Materials and Finishes

Galvanized Steel: Durable and corrosion-resistant for general industrial use. Stainless Steel: High corrosion resistance for harsh or chemical environments. Aluminum: Lightweight and corrosion-resistant, ideal for sensitive or outdoor installations.

Standard Sizes and Custom Options

Standard widths often include 300 mm, with larger or custom sizes available. Lengths and thicknesses can be tailored to project requirements. Accessories such as elbows, junctions, supports, and fixing systems ensure modularity and safe installation.

Covers and Protection

Covers are available for ladder, perforated, and closed-bottom trays. Provide protection against dust, humidity, mechanical impacts, rain, and UV exposure. Compatible with all tray types and materials, ensuring long-term reliability in indoor and outdoor environments.

Manufacturer-

Specific Models

Schiavetti Tekno / Spina Group: Offers stainless steel, galvanized, and wire cable trays with ladder, perforated, closed, and wire-mesh options.

ABB T&

B Cabletray: Provides CAD models, fittings, and accessories for industrial installations, compliant with ASTM, ISO, and UL standards.

Summary

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

For factory applications, the most common cable tray models include ladder, perforated, solid-bottom, wire mesh, and channel trays. Selection depends on cable type, load, environmental conditions, and maintenance requirements. Materials like galvanized steel, stainless steel, and aluminum, along with modular accessories and protective covers, ensure durability, safety, and flexibility for industrial electrical systems.
