Customized Fiber Optic Cables

Overview

FS offers Fibre Patch Cable & Multi-Fibre Breakout Cable with custom connectors like LC/SC/FC/ST/MU/LSH/MTRJ, for low loss or high density wiring needs.

Key Takeaways

Custom fiber optic cables can be tailored to your exact specifications, including fiber type, connector type, jacket, strand count, and environmental ratings, with multiple U. S. manufacturers offering rapid production and delivery.

Customization Options

Custom fiber optic cables allow you to specify a wide range of features to meet your application needs: Fiber Type & Modality: Singlemode (OS2), Multimode (OM1, OM2, OM3, OM4, OM5), or Polarization-Maintaining fibers. Connector Types: LC, SC, ST, FC, MTRJ, MPO/MTP, APC, UPC, and specialty connectors. Jacket Type & Rating: Indoor, outdoor, armored, aerial, tactical, plenum (OFNP), riser (OFNR), or specialized environmental protection.

Strand Count & Length: From 1 to hundreds of fiber strands, with lengths customized to your project requirements. Polarity & Termination: Straight-through, rollover, flipped pair, or MTP/MPO-specific configurations. Special Features: Breakout styles, pulling eyes, fanout lengths, bend-insensitive fibers, and armored or ruggedized assemblies for harsh environments.

Leading U. S.

Manufacturers and Suppliers

Several companies specialize in producing high-quality custom fiber optic cables: Fibertronics, Inc.: Offers indoor/outdoor assemblies, MPO/MTP solutions, armored cables, and tactical fiber assemblies, with compliance to AS9100D, ITAR, and NEC standards. Amphenol Custom Cable: Provides end-to-end solutions from design to delivery, including OEM support, rapid turnaround, and TL 9000-certified manufacturing.

Cables Plus US

A: Features an online form and consultation process to design and approve custom fiber optic cables, including approval drawings before manufacturing. Technical Cable Applications: Specializes in ruggedized, armored, and bend-insensitive fiber cables for harsh environments, with ISO 9001: 2015 and ITAR certifications. Thorlabs: Offers a patch cable configurator for singlemode, multimode, and polarization-maintaining fibers, with fast turnaround for small orders.

FS.com: Provides custom simplex, duplex, uniboot, and ultra-low-loss fiber patch cables for high-density and high-speed networks.

Ordering Process

Typically, ordering custom fiber optic cables involves: Specification Submission: Provide fiber type, connector type, jacket, strand count, length, and any special requirements. Consultation & Quoting: Engineers review your requirements and provide design options and pricing. Approval & Manufacturing: After confirming the design, the manufacturer produces the cables, often with quality inspection and certification.

Delivery: Cables are shipped to your location, sometimes with options for same-day or rapid delivery for small orders.

Applications

Custom fiber optic cables are used in: Data centers and high-speed networkingTelecommunications and broadband infrastructureIndustrial automation and server housesHarsh or outdoor environments requiring armored or tactical cablesOEM products and specialized equipment requiring precise cable assemblies By leveraging these customization options and working with experienced manufacturers, you can ensure your fiber optic network or project meets exact performance, durability, and compliance requirements.
