Data Center Rack Cost Estimation

Overview

Server & Data Center Cost Calculator Guide | Estimate Learn how to use a data center cost calculator to estimate on-premise servers, racks, storage, power.

Key Takeaways

The cost of data center racks typically ranges from $500 to $2,000 per standard rack, with variations based on size, equipment type, and additional services.

Cost Breakdown

Standard Rack Costs: The installation cost for a standard rack in a data center generally falls between $500 and $2,000. This range can vary significantly based on factors such as the complexity of the installation and the type of equipment being housed. Colocation Pricing: For colocation services, the pricing for rack space can be broken down as follows: 1U to 4U: Approximately ₹3,000 to ₹8,000 per month.

Quarter Rack (10U): Around ₹15,000 to ₹25,000 per month. Half Rack (20U–21U): Costs between ₹30,000 and ₹50,000 per month. Full Rack (42U): Typically ranges from ₹60,000 to ₹1,00,000+ per month, depending on additional features and power requirements.

Factors Influencing Costs

Location: The geographical location of the data center can significantly impact pricing. Facilities in major cities often charge more due to better connectivity and infrastructure. Power and Cooling Needs: High-density racks that require advanced cooling solutions can lead to increased costs.

Power usage is often charged separately, which can add to the overall expense. Additional Services: Services such as remote hands support, enhanced security, and bandwidth requirements can also affect the total cost of rack space in a data center. Understanding these factors can help businesses budget effectively for their data center needs and make informed decisions regarding their infrastructure investments.

Frequently Asked Questions

What is data center cost per rack unit?

Average data center cost per rack unit is XXX lakh

What is data center cost per kwh?

Average data center cost per kwh is Inr. xxxxxx lakh.

What is data center cost per mw?

Average data center cost per kwh is Inr. xxxxxxxxx crore

How to calculate Data center total space required?

You may calculate data center space per rack with all utility space including ups, dg, transformer i.e xx sqft.

What is data center cost per server?

1u server average cost is 3-6 lakh.

How much power do the servers consume?

Here's something about the servers:Servers usually come with a single or two-socket. A single-socket server consumes 118W and a two-socket server 3...
