Fiber Optic Cable Junction Box Project

Overview

OPGW cable joint box installation involves several key stages: selecting the appropriate location, preparing both the cable and the joint box, splicing fibers, and sealing the joint box properly. Adhering to these steps ensures optimal performance and longevity of the. Fiber optic junction boxes must be installed as close to the work area as possible to avoid unnecessary cable lengths. It has a hole for a 20mm stuffing gland, two screw holes for wall mounting, cable guides for the slack fibre, and four slots for splice protectors.
