Fiber to Ethernet Interface Module

Overview

Amazon.com: Fiber To Ethernet ConverterDiscover fiber to ethernet converters for extending your network. Find gigabit media converters with reliable perfor.

Key Takeaways

Fiber to Ethernet modules convert fiber optic signals into Ethernet, enabling network extension, device connectivity, and PoE support over long distances.

Overview

A fiber to Ethernet module is a device that allows you to connect Ethernet devices over fiber optic cabling. These modules are essential for extending network connections beyond the typical copper Ethernet limits (100 meters) and for connecting devices in separate buildings or shielded environments. They operate transparently, meaning network traffic passes through without modification, and can support speeds from Fast Ethernet (100 Mbps) to Gigabit (1 Gbps) and 10 Gigabit Ethernet.

Types of ModulesSFP (Small Form-Factor Pluggable) TransceiversPluggable modules that fit into SFP ports on switches or media converters. Available for Fast Ethernet, Gigabit, and 10 Gigabit networks. Support single-mode or multi-mode fiber with varying distances (up to 10 km for single-mode, 2 km for multi-mode) depending on the model.

Modular design allows easy replacement or upgrades without changing the entire device.

Media Converters

Standalone devices that convert a fiber optic signal to copper Ethernet (RJ-45) and vice versa. Can support PoE/PoE+, providing power to devices like IP phones, cameras, or access points over the same Ethernet cable. Typical coverage: up to 100 meters over Cat5e/6 for copper, and tens of kilometers over fiber depending on the transceiver.

Some models include diagnostic LEDs for monitoring link status, network speed, and PoE activity.

Applications

Extending Ethernet networks between buildings or floors.

Connecting I

P phones, VoIP devices, or security cameras in areas without AC power outlets using PoE. Integrating fiber infrastructure in RF-shielded rooms or industrial environments. Upgrading network speed or distance without replacing existing copper cabling.

Key Considerations

Fiber Type: Single-mode for long distances, multi-mode for shorter distances. Ethernet Speed: Ensure the module supports the required network speed (100 Mbps, 1 Gbps, or 10 Gbps).

Po

E Support: Needed if powering devices over Ethernet. Distance: Check the maximum supported fiber distance for your application. Compatibility: Verify that the SFP or media converter is compatible with your switch or network device.

Fiber to Ethernet modules provide a flexible, reliable solution for extending networks, supporting high-speed data transfer, and powering devices remotely, making them ideal for enterprise, industrial, and specialized installations.

Amazon : Fiber To Ethernet Converter

Discover fiber to ethernet converters for extending your network. Find gigabit media converters with reliable performance on Amazon.

Cisco 10GBASE SFP+ Modules Data Sheet

The Cisco® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise

Managed Media Converter, Fibre to Ethernet Converter

FS managed Fibre media converter is equipped with remote Web/SNMP interface for efficient management. The Fibre to ethernet managed media converter is

What is SFP Module and How to Choose it

SFP+ modules are engineered for use in 10-gigabit Ethernet applications sharing the same physical form factor as their SFP counterparts.

SFP modules

The small form-factor plug-in module provides a fiber optic interface with a data transmission speed of 100 Mbps with a wavelength of 1310 nm (long).

10 Gigabit Ethernet

10 Gigabit Ethernet Router with two dozen 10 Gigabit Ethernet ports and three types of physical-layer module 10 Gigabit Ethernet (10GE, 10GbE, or 10 GigE) is a

Cabletron 6H123-50 Smart Switch 6000 Ethernet Module

Cabletron Smart Switch 6000 6H123-50 Ethernet Module FE-100FX Fiber Optic The Cabletron Systems 6H123-50 is a chassis-based Ethernet switching module designed for the Smart Switch 6000

JG230AR HP 10Gb/s XFP 80km 1542.94nm LC Transceiver Module

The JG230AR - HP 10Gb/s XFP 80km 1542.94nm LC Transceiver Module enables high-speed data transmission over long distances using single-mode fiber. It fits into network equipment designed for

Device Networking, Media Conversion, and IoT Connectivity

Device Networking, Media Conversion, and IoT Connectivity Reliable, full-featured and competitively priced Perle Systems is the designer and manufacturer of an extensive range of solutions ideal for
