You can request a quote directly through FS.com's UK portal. Celestica DS6001 is a 20U, 64-port 1.6T OSFP224 switch designed for high-density AI and data center deployments.

It supports hybrid air + liquid cooling but can operate in air-cooled environments. The switch uses Broadcom Tomahawk6 silicon and Intel Xeon CPU, providing 102.4 Tbps switching capacity.

Pricing is typically available on request from authorized resellers like Stordis in the UK.

Technical Considerations

Cooling: Air-cooled 1.6T switches are feasible for standard data center racks, but high-density deployments may require hybrid or liquid-assisted cooling to manage thermal load efficiently. **Power:** Modules like OSFP DR8 consume ~25W per transceiver, and a fully populated 64-port switch can reach several kilowatts, so ensure adequate power provisioning.

Compatibility: FS.com modules are tested with NVIDIA Quantum-X800 switches, while Celestica DS6001 supports open networking standards like SONiC and ONIE for flexible deployment. **How to Request a Quote:** FS.com UK: Visit the product page for the 1.6T OSFP DR8 module and use the "Contact Us" or "Request a Quote" option to get a free quote tailored to your delivery address.

Celestica DS6001: Contact UK resellers such as Stordis or Celestica's sales team to request a quote, specifying the number of ports, cooling configuration, and delivery requirements. By reaching out to these vendors, you can obtain customized pricing, delivery options, and technical support for your 1.6T air-cooled switch deployment in the UK.
