Gbiclx optical module

Overview

The MINI-GBIC-LX-SM1310 is aligned to IEEE 1000BASE-LX optical specifications and supports a link length of up to 10 kilometers over a single-mode fiber (SMF) with an LC connector. Cisco's industry-standard Gigabit Interface Converter (GBIC) is a hot-swappable input/output device that plugs into a Gigabit Ethernet port/slot, linking the port with the fiber-optic network. GBICs can be used and interchanged on a wide variety of Cisco products and can be intermixed in. Planet Technology USA's 1000Mbps Gigabit Ethernet SFP Fiber Transceiver modules operate with an integrated duplex data link over single mode optical fiber. These Small Form Factor Pluggable (SFP) transceiver modules. Applicable to data center and campus networks, enabling cost-effective, efficient, and high-speed interconnection among switches, routers, servers, and network interface controllers (NICs) This product is currently unavailable in your region.
