# H3 switch poe

## Overview

With its 24-port Gigabit power over Ethernet (PoE) capability and additional 4 Gigabit fiber ports, this two-layer WEB network management switch is equipped with a robust 370W POE power supply, making it ideal for a wide range of networking applications. In the new generation of cloud data center and smart campus scenarios, a new generation of intelligent, ultra-wideband, simple, and integrated network is created for users, which is applicable to various scenarios and network sizes. Based on the industry-leading 400 G platform, H3C S12500R supports. Power over Ethernet (PoE), also known as remote power supply, is a technology that delivers power to powered devices (PDs) over twisted pair cables. 1X/ACL), simple centralized operations (SmartMC), and optional PoE+ without over-buying.
