Household modular distribution box models and specifications

Overview

Typically rated for currents from 63A to 125A and voltages up to 400V AC, they come in configurations like 4, 8, 12, 24, or 36 modules, with IP ratings ranging from IP30 to IP65 for indoor or outdoor use. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. GEYA offers a range of distribution boxes, including: MCB Distribution Boxes: GYB1 (metal), GYB4 (modular), GYB5 (transparent), and GYB8 (large capacity) series for circuit protection and distribution. Specialized Boxes: DBS (British standard), DX-AT (with ATS), GYFZ3 (industrial), and GYM1. The HUX-50 series home distribution box is a modern and adaptable enclosure designed to meet diverse electrical distribution needs. Today, electrical systems are essential for homes and industries. But what exactly is a power distribution box, and why is it so essential in our daily lives?

The DB panel board controls the flow of electricity.
