How long is the pigtail with the head attached

Overview

A pigtail connector is a short length of insulated wire—typically 4 to 12 inches long—with a pre-attached terminal, plug, or connector housing on one end. The National Electrical Code (NEC) requires a pigtail to be at least six inches long. Could I have 3” in of wiring coming in then pigtail another 3”?

Or do I need to have 6” coming in regardless as one wire then anything pigtailed is extra?

I want to have minimal wire in there to eliminate any potential shorts. I'm using a 20cu in plastic box with 2 runs of 12/2 coming in Context:. Whether it's an electrical system in your car, home, or factory, the quality of the connection is essential, and that's where pigtail connectors come in. These small, often overlooked components ensure a strong, safe electrical connection.
