How much does a 400mm cable management frame cost per meter

Overview

Discover durable 400mm electrical cable trays in galvanized steel, ideal for wholesale purchases starting at $3.35 per unit.

Key Takeaways

A 400mm cable management frame typically costs between $15 and $40 per meter, depending on material, brand, and installation requirements.

Factors Affecting Cost

Material and Build Quality Cable management frames are usually made from steel, aluminum, or composite materials. Steel frames tend to be more durable but slightly more expensive, while composite or plastic frames are lighter and cheaper. Brand and Supplier Prices vary depending on the manufacturer.

Premium brands or specialized suppliers for FTTH or structured cabling may charge more due to quality assurance and compatibility with specific closures. Installation and Accessories Costs can increase if the frame includes mounting brackets, straps, or covers, or if installation requires labor at height or on poles. Labor costs for mounting can range from $20 to $50 per hour, depending on complexity and location.

Market and Volume Bulk purchases often reduce the per-meter cost. For small-scale installations, expect the higher end of the price range, while large projects may benefit from discounts. Practical EstimateLow-end: $15–$20 per meter for basic steel or composite frames without additional accessories.

Mid-range: $25–$30 per meter for frames with mounting hardware and moderate durability. High-end: $35–$40 per meter for premium frames designed for FTTH networks or specialized closures. For precise budgeting, it is recommended to contact suppliers directly or use a structured cabling cost calculator to include labor, accessories, and installation factors.

This ensures the total cost per meter reflects both material and installation expenses.
