

How much does a Russian ladder-type cable tray cost

Overview

Cable Tray Price List | Electrical Works The cable tray price list are for hot dip galvanized ladder type cable tray. The price is based on standard length.

Key Takeaways

Russian ladder cable trays typically range from \$20 to \$150 per meter depending on material, load capacity, and specifications.

Price Overview

The cost of ladder cable trays in Russia varies widely based on material, dimensions, load rating, and manufacturer. Common materials include galvanized steel, stainless steel, aluminum, and polymer composites, each affecting the price. For example, carbon steel trays with corrosion-resistant coatings are generally more affordable, while stainless steel or halogen-free polymer trays command higher prices due to durability and fire resistance.

Standard industrial ladder trays: \$20–\$50 per meter
Heavy-duty or high-load trays: \$60–\$100 per meter
Premium polymer or fire-resistant trays: \$100–\$150 per meter
These prices reflect base material costs and do not include installation, supports, or accessories such as bends, tees, and reducers.

Factors Affecting Cost

Material Type: Steel is cheaper than stainless steel or polymer composites. Aluminum offers a lightweight alternative with moderate cost. **Tray Dimensions:** Width, height, and rung spacing influence material usage and price.

Wider or taller trays for high cable volumes cost more. **Load Capacity:** Trays designed for heavy industrial cables or long spans require thicker materials and additional supports, increasing cost. **Coatings and Treatments:** Galvanization, powder coating, or fire-resistant treatments add to the price.

Supplier and Brand: Russian manufacturers like Sevcable Structures, Moskabelmet, and UralTray offer different pricing tiers based on quality, compliance with Russian electrical standards, and supply chain integration.

Cost-

Saving Considerations

Open ladder design reduces installation time and labor costs compared to conduit systems, potentially saving 40–60% of total project costs. Modular construction allows future expansion without full replacement, improving long-term value. Local sourcing from Russian manufacturers can reduce import costs and comply with domestic safety standards.

Conclusion

For planning purposes, expect to pay \$20–\$150 per meter for Russian ladder cable trays, with the final cost influenced by material, load requirements, and additional features. Selecting the right tray involves balancing initial investment with long-term durability, fire resistance, and installation efficiency.
