How much does mesh cable tray cost in the United States

Overview

Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidden costs like shipping and installation.

Key Takeaways

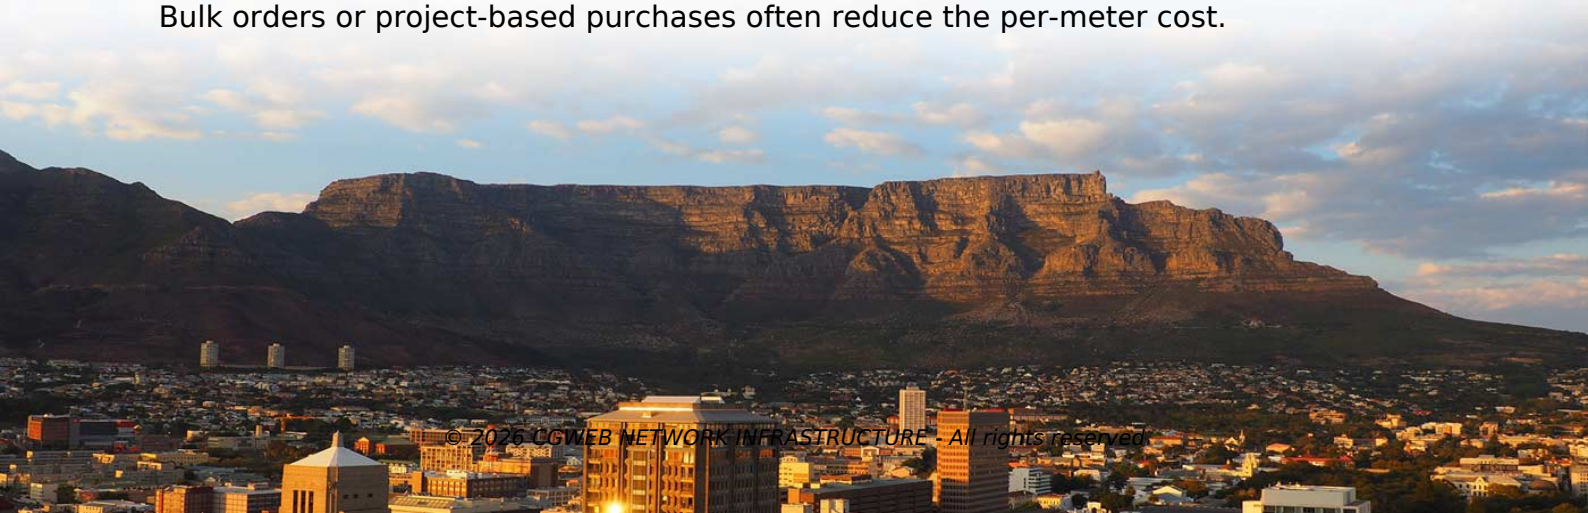

Wire mesh cable trays in the US typically cost between $10 and $25 per meter, depending on material, size, and finish.

Price Range and Factors

The cost of mesh cable trays varies based on material, dimensions, and surface treatment. Standard wire mesh trays are generally the most affordable type of cable tray, ideal for lightweight cabling such as data or network cables. Typical pricing: Steel wire mesh trays: $10–$25 per meter, depending on thickness and coating.

Aluminum mesh trays: $20–$50 per meter, offering lightweight and corrosion-resistant properties. Powder-coated or stainless steel trays: Higher-end options for outdoor or corrosive environments, costing more than standard steel. For example, a 10-foot (approximately 3 meters) black powder-coated wire mesh tray sold in a 2-pack can cost around $100–$150, translating to roughly $16–$25 per meter.

Bulk orders or project-based purchases often reduce the per-meter cost.

Installation and Cost Considerations

Mesh trays are lightweight and easy to install, which reduces labor costs compared to conduit or ladder trays. They can be mounted on walls, ceilings, or under raised flooring, and are flexible for custom configurations. Accessories like connectors, bends, and supports may add to the total project cost.

Cost-

Saving Tips

Buy in bulk: Larger orders reduce per-unit pricing. Select appropriate material: Avoid over-specifying stainless steel if standard steel suffices. Consider pre-galvanized or powder-coated finishes: These offer durability at a lower cost than hot-dip galvanized or stainless steel.

Overall, mesh cable trays are a cost-effective solution for lightweight cabling, with prices in the US generally ranging from $10 to $25 per meter, depending on material, finish, and supplier.
