How to strip the plastic tube of an optical cable without damaging the optical fiber

Overview

Use the fiber stripper to cut off 2" (50mm) of the cable jacket and pull off the cut piece. Be gentle so you do not damage the fiber. A fiber guide and matched blades ensure that the optical fiber is correctly positioned and stripped each time. Sharp-edged slots in the jaws. Without question, good stripping techniques in your fiber optic cable assembly process are imperative. Eventually, this imperfection can initiate a crack when the. At its core, an optical fiber stripper is a specialized tool engineered to precisely remove the protective polymer coatings from an optical fiber without damaging the delicate glass core and cladding beneath. When working with fiber optic strands, an entirely new level of precision is required for the task as the quality and accuracy of the fiber stripper will literally make or break your efforts.
