Huawei Fiber Optic Panel Box Price

Overview

Prices for items sold by Amazon include VAT. Depending on your delivery address, VAT may vary at Checkout. For other items, please see details. Suitable for easy and safe wall mounting.

Key Takeaways

Huawei fiber optic panel boxes typically range from $30 to $150 per unit, depending on port capacity, model, and supplier.

Pricing Overview

The cost of a Huawei fiber optic terminal or distribution box depends on several factors: Port Capacity: Smaller home-use boxes (4–8 ports) are generally cheaper, around $30–$60, while larger enterprise-grade boxes (16–24 ports) can cost $80–$150 or more. Model Type: Indoor boxes are usually less expensive than outdoor-rated boxes with IP65/IP67 protection for harsh environments. Supplier and Platform: Prices vary across platforms like AliExpress and Alibaba, with bulk orders often offering discounts.

Customization and Features: Some suppliers offer minor customization, such as branded logos or pre-installed adapters, which can slightly increase the price.

Additional Considerations

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

Compliance and Standards: Ensure the box supports GPON/XGS-PON standards and has compatible connectors (SC/APC, FC/PC) for your Huawei OLT/ONT systems. Durability: Outdoor boxes should meet IP65/IP67 ratings and have dust-proof and moisture-resistant features for long-term reliability. Installation: Some boxes include cable management slots and reinforced housing for easier installation and maintenance.

For a typical home setup, an 8-port Huawei fiber optic box is often sufficient, while 16-port or 24-port models are recommended for future expansion or enterprise networks. Bulk procurement for large-scale deployments may reduce the per-unit cost, especially for orders exceeding $10,000. In summary, expect to pay $30–$150 per Huawei fiber optic panel box, with the final price influenced by port count, model type, supplier, and additional features.
