Key Takeaways

Meter box and distribution box accessories include replacement doors, keys, latches, hinges, cable entry conduits, and weatherproof or fire-rated enclosures to ensure secure, compliant, and accessible utility installations.

Types of Accessories

Replacement Doors and Lids Meter boxes often require replacement doors or lids due to wear, damage, or vandalism. These doors typically come with pre-fitted latches and hinges and are supplied with a meter box key to maintain security and compliance with utility standards. Keys and Locks Specialized meter box keys are essential for accessing both gas and electric meters.

Some boxes use universal keys, while others may require specific keys depending on the utility type and manufacturer. Cable Entry Accessories Hockey sticks or conduit entry guides are used to safely route service cables and pipes into the meter box, protecting them from damage and ensuring tidy installations. Mounting and Housing Options Meter boxes and distribution boxes are available in surface-mounted, recessed, semi-buried, and universal designs.

Accessories may include brackets, mounting plates, or spacers to accommodate different installation scenarios.

Rated Components Many accessories are designed to enhance durability, including weatherproof seals, fire-rated enclosures, and corrosion-resistant materials like Glass Reinforced Plastic (GRP) to withstand harsh outdoor conditions. Repair Kits Repair kits often include replacement hinges, latches, screws, and seals, allowing for quick maintenance without replacing the entire box.

Compliance and Usage

Accessories are designed to meet UK utility regulations and standards such as BS8567 for electricity meter cupboards and BS8499 for gas meter boxes. They are suitable for residential, commercial, and industrial installations, ensuring safe access for engineers while protecting meters from vandalism, weather, and accidental damage.
