Myanmar quality guaranteed optical transceiver module 200G

Overview

The QDD-200G-2xLR4 transceiver module is designed for use in 200 Gigabit Ethernet links over 10km single mode fiber. The implementation of an 8 channel DML TOSA and ROSA to create a Dual LAN-WDM transceiver. GIGALIGHT offers 25G to 800G immersion liquid cooling extenders for common optical transceivers or active optical cables with various cage options,such as SFP56,QSFP+,QSFP28,SFP112,QSFP56,QSFP-DD,OSFP and OSFP-RHS. The QSFP-DD 2x100G LAN-WDM transceiver is characterized by an 8x25G NRZ electrical. The Cisco ® family of QSFP modules provide solutions for AI/ML data center applications, Network Interface Cards (NICs) on servers, and for data center switches, while leveraging the breakout capabilities and backward compatibility to lower-speed QSFP pluggable modules and cables. Designed for use in next-generation datacenters, these reliable and robust modules support high speed bit rates up to 200Gb/s over. Pro Optix offers a wide range of high performance optical transceivers including 200G fiber transceivers compatible with Cisco, Arista, Juniper and Huawei. More compatible brands will be available for delivery imminently so please reach out to the Pro Optix team for latest updates.

200G Modules

The optical amplifier module developed by GIGALIGHT is designed for long-distance transmission systems in digital optical fiber communication. It is specifically designed to work in conjunction with

200G/400G/800G Optical Transceiver Modules | FiberMall

200G/400G/800G optical module features up to 40km transmission distances using QSFP56/QSFP-DD footprints for data center interconnect applications - FiberMall

Optical Transceiver

What Is The Optical Transceiver?The Common Type of Optical TransceiverActive Optical CableDirect Attach Copper CableOptical module is actually a device that can convert electrical signals into optical signals, thereby speeding up data transmission efficiency. It is mainly composed of: electrical chips, optical chips and optical components. In summary, optical transceivers are efficient data transmission devices. With the rapid development of artificial intellige...See more on unitekfiber naddod
