

Namibian Waterproof Electrical Distribution Box Dimensions Diagram

Overview

EKDB10 Distribution Box | IP65 Plastic Waterproof Discover EKDB10 IP65 waterproof distribution boxes made of durable PC plastic. Available in 4-39 ways, single.

Key Takeaways

Waterproof electrical distribution boxes in Namibia typically follow IP65/IP66 standards, with dimensions varying by module count and configuration, suitable for wall or embedded mounting.

Typical Dimensions and Configurations

Waterproof distribution boxes are available in various module capacities, commonly ranging from 4 to 54 modules, with single, double, or triple layers depending on the application. Standard dimensions for a mid-sized 12-24 module box are approximately: Height: 300-600 mm Width: 200-400 mm Depth: 120-200 mm Larger industrial boxes, such as those used in photovoltaic or commercial installations, can exceed 1000 mm in height and 500 mm in width, with deeper enclosures to accommodate multiple DIN rails and circuit breakers.

Material and Protection

Housing: ABS or polycarbonate (PC) plastic, halogen-free, UV-resistant for outdoor use
 Door: Transparent PC cover for monitoring internal components
 Ingress Protection: IP65-IP66, ensuring dust-tight and water-resistant performance
 Impact Resistance: IK09, protecting against physical damage
 Temperature Range: -25°C to +80°C, suitable for harsh outdoor environments
 Internal Layout
 DIN Rail Mounting: Standard TH35x7. 5 rails for modular breakers
 Circuit Configuration: 4-36 channels, each controlled by a circuit breaker
 Knockout Holes: Top and bottom for flexible wiring entry
 Layering: Single, double, or triple layers for separation of live and neutral circuits
 Mounting Options
 Wall-Mounted: External flange with slots for screws
 Embedded: Internal flange for flush installation
 Dual-Door Design: Separates live parts from non-live parts for safety during maintenance
 Diagram Overview
 A typical waterproof distribution box diagram includes:
 Front View: Transparent door, module slots, and labeling area
 Side View: Depth showing DIN rail placement and cable entry knockouts
 Top/Bottom View: Knockout positions for wiring
 Internal Layout: Arrangement of DIN rails, circuit breakers, and grounding terminals
 These diagrams are usually provided by manufacturers like ETEK, SinoBreaker, IDE Electric, and Selhot Electric and can be requested for specific module counts or custom configurations.

For Namibian installations, ensure the box meets IEC 60529 standards for IP rating and is suitable for outdoor exposure to sun, dust, and occasional rain. Custom sizes and pre-assembled solutions are available for larger or specialized projects.
