Nauru s legitimate underground fiber optic cable factory

Overview

The East Micronesia Cable Project (EMCP) is a state-of-the-art, regional submarine fibre-optic cable system that connects Nauru to Tarawa, Kosrae, and Pohnpei, and extends onward to Guam. With the support of development partners, including Australia, Japan, and the USA, this project will bring. The Project's objective is to facilitate social and economic benefits for the people of the Federated States of Micronesia, Kiribati and Nauru by providing faster, higher quality, and more reliable internet connectivity via a submarine cable, replacing current less reliable satellite services. Welcome to Nauru Fibre Cable Corporation (NFCC), your gateway to reliable, high-speed internet and telecommunication services. As Nauru's leading telecommunications infrastructure provider, we are committed to enhancing connectivity across the island by delivering efficient and low-cost internet. [Yaren, Nauru] 09th August 2025 – NFCC is proud to announce the successful landing of the East Micronesia Cable System (EMCS) submarine cable at its cable landing site in Yaren, Nauru.
