# Network Cabinet Size Survey Form

## Overview

This Network Cabinet Survey v13 checklist from Roc Technologies helps technicians document critical details of on site network cabinets. Capture site and room information, physical access and doorway sizes, housekeeping and lighting conditions, and any required access equipment. Record rack location and size, equipment stored in and on the cabinet, available power sockets, rail widths, and cable entry points. Capture photos of racks, ceilings, obstructions. Project and Site Details: Basic information like client name, project name, survey date, site contact information, and exact site address. Environmental Assessment: Documentation of room dimensions, available rack space (RU units), power outlets (type, voltage, amperage), cooling (HVAC capacity. The Network Site Survey Form serves as a comprehensive tool designed to gather critical information relating to network architecture, user needs, and specific equipment required for installations facilitated by authorized Toshiba dealers. Open the file in any PDF-viewing software.
