# On-site pricing for network server racks

## Overview

Learn how to use a data center cost calculator to estimate on-premise servers, racks, storage, power, cooling, and maintenance. See 3–5 year TCO to compare quotes. Storage in TB and cost per TB — useful for NAS/SAN or local storage clusters. Together, this gives you a clean hardware CapEx number: everything you buy on day one. To get operating costs, the calculator needs your expected IT load (kW), your PUE (Power Usage Effectiveness), and your electricity. AI workloads are creating a two-track colocation market: standard deployments at 3-5 kW per rack, and high-density AI colocation at 20-100 kW or more per rack, with very different pricing structures. Businesses can choose from various setups, including full racks, half racks, or private cages, each. Colocation pricing covers the recurring cost of housing your servers and network equipment in a third-party data center, billed mainly across space, power, bandwidth, and support. Entry-level racks, such as small wall-mounted units, typically range from $200 to $500. High-end or. Buyers typically pay based on rack size, materials, cooling needs, and added components.
