Price of Cable Tray Supports for Electrical Shafts

Overview

Elecload offers a variety of Tray Supports to provide a sturdy and reliable foundation for your cable tray systems.

Key Takeaways

Cable tray supports for electrical shafts typically range from £10 to £50 per unit, depending on material, load capacity, and design.

Overview of Cable Tray Supports

Cable tray supports are brackets or hangers used to secure cable trays along walls, ceilings, or shafts, ensuring safe and organized routing of electrical cables. They are essential in commercial and industrial installations to prevent cable sagging, maintain accessibility, and comply with safety standards. Supports can be wall-mounted, ceiling-hung, or shaft-specific, and are often made from steel, stainless steel, or galvanized materials for durability and corrosion resistance.

Factors Affecting Price

Material: Stainless steel or heavy-duty galvanized steel supports are more expensive than light-duty or powder-coated steel. Load Capacity: Supports designed for heavy cable loads or long spans cost more due to reinforced construction. Design and Type: Adjustable supports, multi-level brackets, or specialized hangers for vertical shafts are priced higher than standard fixed brackets.

Brand and Supplier: Premium brands like Legrand, Schneider Electric, or OBO BETTERMANN may charge more for certified, high-quality components. Quantity and Bulk Orders: Purchasing in bulk often reduces the per-unit cost, while single units or custom sizes may be more expensive. Typical Price RangeLight-duty supports: £10–£15 per unitMedium-duty supports: £15–£30 per unitHeavy-duty or stainless steel supports: £30–£50 per unitThese prices are indicative for the UK market and may vary depending on supplier, shipping, and project-specific requirements.

Additional Considerations

Accessories such as clamps, bolts, and couplers may add to the total cost. Compliance with standards like DIN EN 61537 ensures safety and long-term reliability. Installation costs should also be factored in, especially for vertical shaft applications or complex routing.

For accurate pricing, it is recommended to request quotes from suppliers such as RS, CEF, or OBO BETTERMANN, specifying the material, load rating, and installation type required.
