Price of Mesh Cable Tray Fittings

Overview

50 Pack Wire Mesh Cable Tray Coupler Kit, Steel Available at a lower price from other sellers that may not offer free Prime Wire Mesh Trays | McMaster-Carr.

Key Takeaways

Mesh (wire basket) cable trays typically cost between $2 and $25 per meter, with installation costs varying based on material, size, and complexity.

Material Costs

Steel Wire Mesh Trays: The most affordable option, ideal for lightweight cables in offices or data centers. Prices generally range from $2 to $10 per meter depending on thickness and coating (pre-galvanized or hot-dip galvanized). Aluminum Mesh Trays: Lightweight and corrosion-resistant, suitable for outdoor or humid environments.

Costs range from $6 to $30 per meter.

FR

P (Fiberglass Reinforced Plastic) Trays: High corrosion resistance for industrial or chemical environments, priced between $10 and $50 per meter.

Installation Costs

Installation depends on tray type, size, supports, connectors, and labor complexity. Skilled labor and accessibility can significantly affect the final cost. For standard wire mesh trays, installation is generally faster than conduit or ladder trays, reducing labor costs by 40–60% in some projects.

Typical installation cost per meter can range from $5 to $25, including supports and brackets.

Cost Factors

Tray Width & Height: Larger trays require more material, increasing cost. Surface Treatment: Hot-dip galvanized (HDG) trays are more expensive than pre-galvanized due to durability and corrosion resistance. Order Quantity: Bulk orders can reduce per-meter costs by 20–40%.

Location & Accessibility: High ceilings, outdoor installations, or complex routing can increase labor costs. Additional Accessories: Connectors, bends, and supports add to the total project cost.

Summary

For budgeting purposes, a small office or data center using steel wire mesh trays may expect $2–$10 per meter for materials and $5–$25 per meter for installation, while aluminum or FRP trays for industrial or outdoor use will be higher. Bulk purchasing and simpler installation routes can significantly reduce overall costs.
