Key Takeaways

The price of a multi-circuit outdoor distribution box typically ranges from $150 to $1,500 or more, depending on specifications, capacity, and customization.

Price Range and Factors

Outdoor distribution boxes vary widely in cost based on voltage rating, number of circuits, material construction, and weatherproofing. Standard residential or light commercial units often start around $150–$300, while larger industrial or utility-grade boxes with multiple circuits, advanced safety features, and weatherproof enclosures can cost $500–$1,500 or higher. Premium models with smart monitoring, remote control, or custom configurations may further increase the price.

Product Examples

Amazon listings show multi-circuit power distribution boxes for construction or emergency use, typically in the $200–$400 range for portable units with multiple outlets and circuit breaker protection. Weisho Electric offers outdoor cable distribution boxes for medium voltage applications, fully weatherproof and customizable, with lead times of 10–15 business days for standard units and 3–5 weeks for custom orders.

K suppliers like CEF provide three-phase distribution boards and outdoor-rated boxes, with prices varying according to amperage, number of circuits, and accessories.

Additional Considerations

Installation costs: Outdoor boxes often require professional installation, which can add several hundred dollars depending on complexity. Customization: Voltage levels, connector types, and enclosure materials can significantly affect pricing. Durability: Weatherproof and tamper-resistant enclosures designed for outdoor use generally carry a premium.

Maintenance and long-term operation: Units with advanced monitoring or digital displays may have higher upfront costs but can reduce long-term maintenance expenses. For accurate pricing, it is recommended to compare suppliers and consider both the initial purchase price and installation costs, especially for industrial or utility applications.
