Price of a simple electrical distribution box for a bungalow

Overview

Electrical Box Installation Cost Guide for U.S. Homes 2026This guide covers cost, price ranges, and practical budgeting for standard electrical box install.

Key Takeaways

A basic indoor electrical distribution box for a bungalow typically costs between $10 and $60, with plastic single-gang boxes being the most affordable option.

Cost Breakdown

Material and Type: Plastic single-gang boxes: $10–$20, suitable for standard indoor wiring and up to five conductors. Metal boxes: $20–$50, stronger and more durable, often used where extra protection or grounding is required. Weatherproof or outdoor boxes: $70–$450, designed for exposure to rain, UV, and dust.

Installation Costs: Labor for installing a simple indoor box typically ranges from $100 to $300, depending on location, wiring complexity, and electrician rates. For a basic bungalow setup, a single-gang plastic box with minimal wiring adjustments represents the lower end of both material and labor costs. Additional Considerations: Box depth and fill: Standard single-gang boxes are sufficient for up to five conductors; deeper or multi-gang boxes increase cost.

Accessories: Mounting screws, connectors, and minor wiring adjustments are usually included in the lower-end price estimates. Material choice: Plastic is lightweight and budget-friendly, while metal offers durability and better impact resistance. For a typical bungalow with standard indoor wiring, a plastic single-gang box is the most cost-effective choice, with a total cost (materials plus basic installation) likely in the $110–$150 range.

Choosing metal or weatherproof boxes, or adding multiple circuits, will increase the overall expense.
