

Price of outdoor four-core optical fiber cable

Overview

Amazon.com: Outdoor Fiber Optic Cable Industrial-grade outdoor fiber optic cables with armor protection. Multiple configurations for long-distance transmiss.

Key Takeaways

The price of 4-core outdoor optical fiber cables ranges from approximately \$0. 40 to \$2. 04 per meter, depending on type, durability, and installation requirements.

Price Overview

The cost of 4-core outdoor fiber optic cables varies based on fiber type, jacket material, and protective features: Standard single-mode OS2 cables with PVC jackets typically cost \$0. 60-\$0. 90 per meter, with a 100-meter reel priced around \$60-\$90 for basic outdoor use (OWIRE).

Ruggedized armored cables with TPU jackets, steel mesh, or direct burial capability can cost more, ranging from \$1. 50-\$1. 80 per meter for high-durability outdoor installations (OWIRE, FLYPROFiber).

Bulk or wholesale options may start at \$2. 04 per unit for armored outdoor cables, with minimum order quantities of 10 units, suitable for FTTX deployments (Alibaba).

Factors Affecting Price

Fiber Type: Single-mode (OS2) supports long-distance transmission and is more expensive than multimode (OM3/OM4) designed for shorter runs. **Jacket Material:** Outdoor-rated, UV-resistant, waterproof, or armored jackets increase durability and cost. **Installation Environment:** Direct burial, aerial, or conduit installations may require specialized cables, affecting price.

Length and Volume: Longer reels and bulk orders often receive tiered discounts, reducing per-meter cost. **Brand and Certification:** Reputable brands like OWIRE and FLYPROFiber provide tested cables meeting ISO/IEC or TIA/EIA standards, which can justify higher prices.

Typical Use Cases

Backbone cabling and campus networks: Single-mode 4-core cables for long-distance, high-performance connectivity. **Industrial or harsh environments:** Armored TPU cables with steel mesh for roads, snowfields, or construction sites.

FTT

X deployments: Bulk low-cost armored cables for last-mile outdoor connections. In summary, expect to pay between \$0.40 and \$2.

04 per meter for 4-core outdoor fiber optic cables, with the final price depending on durability, fiber type, and installation requirements. For large-scale projects, purchasing in bulk from reputable suppliers can provide cost savings while ensuring quality and compliance.
