Prices for Cable Tray Bends

Overview

Cable Tray Cable Tray Fitting, 90° Junction Kit. Material: Carbon Steel. Finish: Electroplated Zinc. Includes: (1) Hardware for (1) Tee (2) 90° Bends. Clea.

Key Takeaways

Cable tray bends typically range from $10 to $200+ depending on material, size, and angle. Price Ranges by Type and MaterialPVC and Non-Metallic Bends: Smaller 3/4" to 1" PVC elbow covers or low-voltage raceway bends are generally priced around $10–$30 per piece for standard 45° or 90° bends in office white or similar finishes (PLATT Electric Supply).

Steel and Pre-

Galvanized Bends: Medium-duty 90° horizontal or vertical bends in pre-galvanized steel typically cost $25–$75, depending on width (12"–18") and depth (2"–6"). Aluminum Bends: 90° horizontal bends with 12"–24" radius and widths of 12"–18" are priced around $50–$150, with larger or thicker aluminum bends reaching higher prices due to material and load capacity. Stainless Steel Bends: High-grade stainless steel (Type 304) 45° or 90° bends are more expensive, often $100–$200+, suitable for industrial or corrosive environments.

Factors Affecting Pricing

Angle and Bend Type: 45° bends are generally cheaper than 90° bends; inside bends may cost slightly more than outside bends due to fabrication complexity. Material: PVC and aluminum are lighter and less expensive than stainless steel or carbon steel with electroplated finishes. Size and Load Capacity: Wider and deeper bends that support more cables or heavier loads increase the price.

Finish and Coating: Electroplated zinc, powder-coated, or traffic-rated finishes add to cost. Supplier and Volume: OEM or factory-direct purchases can reduce costs, and bulk orders often qualify for discounts.

Purchasing Tips

Ensure the bend radius matches or exceeds the minimum cable bending radius to prevent damage. Compare supplier options: PLATT Electric Supply, Metalix, and Shop4 Electrical offer ready-to-ship bends, while Alibaba and Made-in-China provide bulk and OEM options. Consider installation environment: For corrosive or outdoor settings, stainless steel or coated steel bends are recommended despite higher cost.

By evaluating material, size, and supplier options, you can select cable tray bends that balance cost, durability, and installation requirements.
