Prices for Level 1 and Level 2 Distribution Boxes

Overview

Types and prices of distribution boxes in 2025_COLORIA GROUPFrom basic metal boxes to AI-powered energy hubs, distribution systems are becoming the unseen.

Key Takeaways

Level 1 distribution boxes typically range from $50 to $200, while Level 2 units can cost between $200 and $800 or more depending on capacity and features. Level 1 Distribution BoxesLevel 1 distribution boxes are generally basic residential or small commercial units designed for lower amperage and fewer circuits. Prices for these units usually start around $50 for simple single-phase boxes and can go up to $200 for more robust models with additional safety features, weatherproofing, or modular circuit options.

These boxes often include standard circuit breakers, fuses, and basic enclosures suitable for indoor installations. Level 2 Distribution BoxesLevel 2 distribution boxes are larger, higher-capacity units suitable for commercial, industrial, or advanced residential applications. They typically support three-phase power, higher amperage, and more circuits, and may include smart monitoring, surge protection, and modular expansion capabilities.

Prices for Level 2 boxes generally range from $200 to $800 or more, depending on specifications such as voltage rating, number of circuits, material construction, and integrated safety features. Outdoor-rated or weather-resistant units often carry a premium.

Factors Affecting Price

Amperage and voltage capacity: Higher ratings increase cost. Number of circuits: More circuits require larger enclosures and more components. Material and durability: Metal or corrosion-resistant enclosures cost more than basic plastic units.

Smart features: Remote monitoring, energy tracking, and load management add to the price. Installation and compliance: Some units may require professional installation or adherence to local electrical codes, which can affect total cost.

Summary

For budgeting purposes, Level 1 distribution boxes are generally under $200, suitable for small-scale applications, while Level 2 boxes can exceed $800 for high-capacity, feature-rich installations. Prices vary based on technical specifications, environmental ratings, and additional features, so it is recommended to consult suppliers for exact quotes tailored to your project needs.
