Retail DAC High-Speed Cable 800G

Overview

This 800G Copper DAC delivers low-latency, power-efficient interconnects between switches, routers, and servers, supporting aggregated bandwidth up to 800G over passive twinax copper for rack-level and adjacent rack deployments. With their simple structure, low power consumption, and convenient deployment, DACs provide a cost-effective. The 800G DAC cables deliver cost-effective, ultra-low-latency direct-attach connectivity for high-density data centers and HPC environments. Compatible with common 800G form factors (OSFP and QSFP-DD800), our cables are factory-tested and supplied with EEPROM programming and electrical test reports. The Volex DAC cable product family includes cable assemblies with Small Form-factor Pluggable (SFP), Quad Small Form-factor Pluggable (QSFP), and Octal Small Form-factor Pluggable (OSFP) single and double density modules.
