Sangfor AC3300 access switch cannot connect to the internet

Overview

Restart your router for an easy fix that usually solves the problem. Check the network settings on your devices to make sure everything is correct. The easiest and most common solution is to turn it off and on. In addition to the authentication of guests via SMS, Portal, and Social Media, QR codes tailored to specific visitor groups can be created to allow guests to connect to Wi-Fi by simply opening and scanning with any QR code software. This effectively eliminates the need to regularly change your. On this page, you will find a range of support resources by Sangfor, including community support, live chat, COVID support, technical documents, and more. However, users may encounter difficulties when attempting to connect to the internet through a network switch. A network switch operates at the data. As title states, every time i try to connect to wifi (when i open internet settings) my switch just crashes :/ not sure what's causing this and any help would be appreciated, or if theres any homebrew app i can download that can allow me to connect to the internet □□ thanks :) Hey guys. The switch is likely set to a static IP address.
