# Supply of hot-dip galvanized cable trays in Egypt

## Overview

Cable Tray Manufacturer In Egypt | Metal StoreMetal Store is a leading cable tray manufacturer in Egypt, providing Cable Tray Systems & Solar Energy Soluti.

## Key Takeaways

Hot-dip galvanized cable trays in Egypt offer durable, corrosion-resistant solutions for efficient cable management in industrial and commercial projects.

### Overview of Hot-

Dip Galvanized Cable TraysHot-dip galvanized cable trays are made from steel sheets coated with zinc through a hot-dip galvanization process, providing exceptional protection against rust and corrosion, making them suitable for harsh environments. They are available in various types, including perforated trays, cable ladders, wire mesh trays, and cable trunks, each designed for specific cable loads and applications. The perforated design allows ventilation, preventing overheating of cables and ensuring optimal system performance.

### Material and Standards

In Egypt, cable trays are typically manufactured from high-grade steel and comply with international standards such as EN, ASTM, DIN, and BS for steel quality and galvanization. Thicknesses range from 1. 0 mm to 3.

0 mm, depending on load requirements and project specifications. Hot-dip galvanization ensures long-lasting performance, even in outdoor or industrial environments with high humidity or corrosive conditions.

## Installation Considerations

Support and Mounting: Cable trays can be suspended from ceilings, mounted on walls, or fixed to floors using appropriate supports and brackets. Proper spacing of supports is critical to prevent sagging and maintain structural integrity. Load Capacity: Select trays based on cable weight and volume.

Ladder trays are ideal for heavy power cables, while perforated or mesh trays suit lighter data and control cables. Ventilation and Heat Dissipation: Perforated trays allow airflow, reducing heat buildup. For high-current cables, ensure adequate spacing and ventilation to prevent overheating.

Ease of Maintenance: Hot-dip galvanized trays are designed for quick installation and easy cable changes, reducing labor costs over the project lifecycle. Safety and Compliance: Ensure installation follows local electrical codes and safety standards, including grounding and bonding of metallic trays to prevent electrical hazards.

## Local Suppliers and Manufacturers

Several Egyptian companies specialize in hot-dip galvanized cable trays: EIG: Offers a wide range of galvanized steel trays and accessories, compliant with international standards. Metal Store (MS Steel): Provides hot-dip galvanized trays with in-house galvanization and electrostatic painting, suitable for urgent project demands.

M

T Tray (Metal Tech): Produces perforated trays, ladders, and trunks with high load capacity and easy installation options. Brilltech Engineers: Supplies high-quality hot-dip galvanized trays with perforated designs for ventilation and durability. ApplicationsHot-dip galvanized cable trays are widely used in industrial plants, commercial buildings, power distribution systems, and outdoor installations.

They are ideal for high-load power cables, data and control cables, and environments exposed to moisture or corrosive agents.

## Summary

For projects in Egypt, hot-dip galvanized cable trays provide a reliable, corrosion-resistant, and easy-to-install solution for cable management. Selecting the appropriate tray type, thickness, and support system ensures long-term performance, safety, and efficient cable routing. Local manufacturers like EIG, Metal Store, MT Tray, and Brilltech Engineers offer a range of products and installation support to meet project requirements.

Cable Tray Manufacturer In Egypt | Metal Store

Metal Store is a leading cable tray manufacturer in Egypt, providing Cable Tray Systems & Solar Energy Solutions with hot-dip galvanized trays, ladders, trunks

Cable Tray Products: 5 Best Trays, Ladders & Trunks

Browse our full range of cable tray products in Egypt: Cable Trays, Cable Ladders, Cable Trunks & Wire Mesh Trays. Hot-dip galvanized & custom finishes available.

Cable Trays – EIG

The definition of galvanized steel plate is to prevent the surface of the steel plate from corrosion, prolong its service life, coated with a layer of metal zinc on the

Cable Trays

Made of cold galvanized sheet and hot galvanized sheet, with thicknesses ranging from 0.8 mm to 4 mm. Made of black iron, then electrostatic paint is applied

Rovana Trade

With a fully equipped factory and expert team, we deliver durable, customized, and reliable solutions for electrical and industrial infrastructure across Egypt and the Middle East.

About Rovana Trade

Learn about Rovana Trade, Egypt''s premier manufacturer of cable trays and ladders, offering high-quality Hot Dip Galvanized and Electrostatic Painted solutions for industrial and electrical projects.

Galvanized Cable Tray In Egypt

We offer top-notch Galvanized Cable Trays in Egypt. These metal trays, coated with a special zinc shield, resist rust and last a long time, even in tough environments.

Best 14 Cable Tray Companies in Egypt | Egypt Yellow

Your guide to cable tray companies which specializes in designing and supplying cable trays, which are crucial for organizing and protecting electrical cables in

Cable Trays – Square

At Square EIC, we provide high-quality, heavy-duty cable tray systems designed to support, route, and protect electrical power, data, and control cables. Our systems ensure organized cable management,
