

The fiber optic router is blue

Overview

Solid blue: Your internet is working correctly. If it stays red, power cycle your Fiber Jack. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do. POWER Normal: Solid/stagnant light. PON (Passive Optical Network) Normal: Solid. This guide breaks down every common light color and pattern you will see on modems and routers from major ISPs including Xfinity, Spectrum, AT&T, and CenturyLink. Whether your modem is blinking orange, your router has a solid red light, or you are staring at a mysterious "DS" indicator, you will. Router status lights, often referred to as LED indicators, are small lights on the front panel of your router. These lights help users understand the operational state of the device and its various components. Typically, these lights correspond to various router functions such as power. The Fiber Jack is the small box on your wall where the fiber optic cable enters your home. Before we start troubleshooting, let's make sure you've found the right device. Your Fiber Jack is the small white box that connects your home to. Whether you're dealing with a standalone modem, a router, an optical network terminal (ONT) for fiber internet, or an all-in-one gateway device, learning to read these lights is like understanding your equipment's language.
