The pigtail connector model is DLC

Overview

The DLC or Data Link Connector is an OBD II, 16-pin, standard connector used in all automobiles manufactured since 1996. They share information over the CAN bus on the Computer Area Network. The data link connector (DLC) is the multi-pin diagnostic connection port for automobiles, trucks, and motorcycles used to interface a scan tool with the control modules of a given vehicle and access on-board diagnostics and live data streams. It plays a pivotal role in maintaining and improving vehicle performance, fuel efficiency, and emissions control. Highly recommended! CONNECTOR KITS CONNECTOR PIGTAILS AUTOMOTIVE WIRE AUTOMOTIVE COMPUTERS ADAPTER HARNESSES. 20 AWG Automotive TXL Wire Tan w/ Black Stripe by the foot. BUY. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements. The purchase of Global Recycled Standard (GRS) certified.
