The pigtail wire needs to be cut off

Overview

The pigtail wires should be cut from the same gauge and color wire as the existing circuit, typically 12-gauge for a 20-amp circuit or 14-gauge for a 15-amp circuit. Once cut, use the wire strippers to remove approximately three-quarters of an inch of insulation from the end of the pigtail and the. Is it acceptable to cut some of the pigtail wire off of an AFI, CAFI, GFI, EPD, or DF breaker to fit in the panel?

Issue: Can we cut the AFI breaker white coiled wire?

Product Line: Circuit Breakers Environment: AFI Circuit Breaker Resolution: Yes, the pigtail wire can be cut to shorter lengths. Visit our Community for first-hand insights from experts and peers on this topic and. Have you ever spliced the neutral pigtail coming from the afci and gfci breaker because it was too short?

I have, and out of curiosity I looked it up with a couple of manufacturer's websites. It's kind of rough learning these things after the fact. Is this a big deal in your opinion.
