UAE Professional Mesh Cable Tray Specifications

Overview

Wire Mesh Cable Tray Manufacturer in Dubai UAEHigh-quality wire mesh cable trays manufactured in Dubai and supplied across Wire Mesh Cable Tray Manufacture.

Key Takeaways

Wire mesh cable trays in the UAE are high-strength, welded steel systems designed for flexible, ventilated, and durable cable management in commercial, industrial, and data infrastructure projects.

Materials and Finishes

Wire mesh cable trays are typically manufactured from hot-dip galvanized steel, electro-zinc plated steel, stainless steel, or black painted steel to suit different environmental conditions and corrosion resistance requirements. Powder-coated finishes are also available for indoor installations requiring enhanced aesthetics. Electro zinc or stainless steel options are preferred for coastal, food processing, or pharmaceutical environments due to high corrosion resistance.

Dimensions and Thickness

Standard wire mesh cable trays come in a variety of widths ranging from 40mm to 1000mm, heights from 25mm to 100mm, and wire thicknesses of 3mm, 4mm, 5mm, and 6mm. These dimensions allow for lightweight installation while supporting low to medium cable loads, with reinforced trays available for heavier industrial applications.

Design and Features

Open mesh grid construction for 360-degree ventilation, reducing heat buildup and improving cable performance. Lightweight and flexible for easy routing, cutting, and shaping on-site using basic tools. Supports horizontal and vertical mounting, including suspended ceilings, server rooms, and office wiring.

Tool-free adjustability allows rapid reconfiguration and scalability for dynamic installations. Factory-made fittings such as tees, bends, and couplers enable directional changes and on-site modifications.

Standards Compliance

Many UA

E manufacturers produce wire mesh cable trays conforming to British/European standard BS EN 61537, ensuring safety, durability, and compatibility with international cable management practices.

Applications

Wire mesh cable trays are widely used in: Data centers and IT infrastructure for structured cabling and fiber optic networks. Commercial and industrial buildings for electrical and communication wiring. Hygienic or dust-sensitive environments such as pharmaceutical plants and food processing facilities.

Accessories

A full range of accessories is available, including tray joiners, couplers, bends, tees, and mounting brackets, ensuring secure installation and load distribution. These specifications make wire mesh cable trays a versatile, durable, and efficient solution for professional cable management across the UAE.
