Using a 1000Mbps router for a 200Mbps fiber optic connection

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. Is Your Existing Router Actually Fiber-Ready?

Fiber optic internet represents a. If your speed tests are stuck around 100–200 Mbps, the cause is usually a local bottleneck such as Wi-Fi limitations, a 100 Mbps Ethernet link, an older router, a bad cable, device performance limits, or incorrect ISP provisioning. The fastest way to solve it is to isolate each part of the. TP-Link router speed isn't one single number. This page covers the most common questions about TP-Link router speed, including how signal. But then, fast-forward a few years to now and all my tests when I connect through this router show only up to 200Mbps (DL) speed. I suspected something must be wrong, so I called up my ISP and they told me to just plug the cable (fibre to the home), that they installed in the home, directly in the. There's an integrated speedtest when you log into the router, that shows about 970~ down and up. However, my wife's PC is only getting roughly 300 down and up to an AT&T server in Houston, TX through speedtest.
