

Waterproof rating of industrial switches

Overview

IP68-rated waterproof switches represent the gold standard for moisture protection, offering complete dust-tightness and resistance to continuous water immersion under specified conditions. Whether you're upgrading your factory's automation systems or retrofitting equipment in an outdoor setting, understanding Cisco's IP66/IP67-rated heavy-duty industrial switches are designed to provide secure and reliable connectivity in the harshest environments. The high quality design and PC materials used with its resistance to Ultra Violet (UV) radiation ensures that the product can meet electrical safety requirements in various applications. From industrial warehouses to marine vessels, from solar farms to construction sites, the right waterproof switch can protect your equipment, reduce downtime, and save you money.
