Weight of an 18u Network Cabinet

Rear of the optical fiber distribution box

Overview

With a weight capacity of 1000 lbs, this 18U network cabinet can effectively organize hardware, ensuring a stable network installation environment.

Key Takeaways

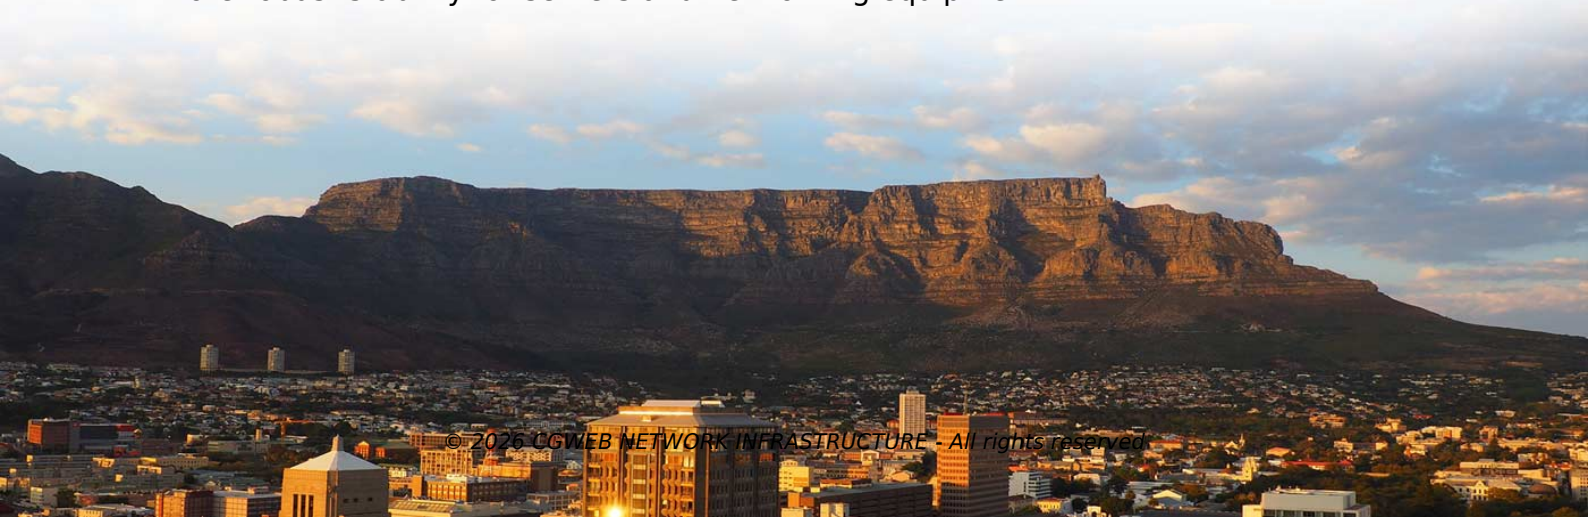

The weight of an 18U network cabinet typically ranges from 90 to 140 pounds (41–64 kg), depending on design and materials. Typical Weight RangesWall-Mount Cabinets: Lightweight 18U wall-mount cabinets, such as the Tripp Lite SRW18US, generally weigh around 113 pounds (51 kg) and are constructed from heavy-duty steel with a powder-coated finish.

Nave

Point 18U wall-mount cabinets weigh approximately 132 pounds (60 kg) and support up to 132 lbs of equipment. Smaller or more compact wall-mount models may weigh closer to 90 pounds (41 kg).

Floor-

Standing Cabinets: Floor-standing 18U cabinets, like those from AZE Systems, are typically heavier due to solid steel construction and reinforced bases, often exceeding 130 pounds (59 kg). These models provide higher load capacities and more robust stability for servers and networking equipment.

Factors Affecting Weight

Material: Steel cabinets are heavier than aluminum or composite models. Powder-coated steel is common for durability. Design: Wall-mount cabinets are lighter and more compact, while floor-standing cabinets include solid bases and additional panels, increasing weight.

Accessories: Hinged doors, perforated panels, shelves, and fans add extra weight. Fully assembled units are heavier than flat-pack versions. Load Capacity: Cabinets designed to hold more equipment often have reinforced frames, which increases the cabinet's own weight.

For example, some wall-mount 18U cabinets support up to 250 lbs (113 kg) of equipment.

Summary

For planning installation or shipping, expect an 18U network cabinet to weigh between 90 and 140 pounds (41–64 kg). Wall-mounted models are generally lighter, while floor-standing cabinets are heavier and more robust. Always check the manufacturer's specifications for exact weight and load capacity before installation.
