# What is PG cable tray

## Overview

P31CABLE TRAY Available on the main routing accessories, this new innovative system facilitates the accessories installation, regardless of the cable tray.

## Key Takeaways

A PG cable tray is a pre-galvanised steel tray used to support and route electrical or data cables in indoor and dry environments.

## Overview

### A P

G cable tray is a type of cable management system designed to hold and organize electrical and data cables safely and efficiently. The "PG" designation stands for pre-galvanised, meaning the steel has been coated with a layer of zinc to protect against corrosion, making it suitable for indoor and dry areas. These trays are commonly used in commercial buildings, industrial facilities, data centers, and structured wiring systems.

## Features

Material and Finish: Made from medium or light-duty steel with a pre-galvanised (PG) finish for corrosion resistance. Design: Typically includes a punched base or return flanges to provide strength, stability, and easy cable installation. Lengths and Sizes: Available in standard lengths (e.g., 3 meters) and various widths (e.g., 100mm, 450mm) to accommodate different cable volumes.

Installation: Can be mounted using threaded rods, brackets, or other fixings, allowing secure and adjustable positioning. ApplicationsPG cable trays are ideal for: Electrical cable containment in commercial and industrial environmentsData and structured cabling systems in offices and data centersIndoor installations where moisture exposure is minimal AdvantagesDurability: The pre-galvanised coating protects against rust and extends the tray's lifespan. Ease of Installation: Standardized lengths and punched bases simplify mounting and cable routing.

Flexibility: Suitable for a wide range of cable types and volumes, with options for medium or light-duty applications. In summary, a PG cable tray is a reliable, corrosion-resistant solution for organizing and supporting cables in indoor electrical and data installations, providing both structural support and efficient cable management.
