What tools are used for fiber optic splicing and stripping

Overview

The Complete Guide to Fiber Optic Tools: Splicing, Cleaving, and. Master your FTTx installations with Weunion's guide to fiber optic tools. Explore high.

Key Takeaways

Fiber optic cable stripping and splicing require specialized tools such as hand strippers, thermal strippers, cleavers, crimpers, and splicing kits to ensure precise, damage-free fiber preparation and connection.

Stripping Tools

Hand Strippers: These are basic tools designed to remove the outer jacket, buffer coating, or aramid yarn from fiber optic cables. For example, the JIC-125 Fiber Optic Stripper removes 250 µm buffer coating to expose the 125 µm optical fiber, suitable for single fibers. Thermal Strippers: These use controlled heat to remove coatings, including baked-on or fluoroacrylate undercoatings, without damaging the fiber.

Adjustable thermal strippers can handle cladding diameters from 30 µm to 1000 µm and buffer diameters up to 1200 µm.

Mid-

Span Slit & Ring Tools: These allow technicians to access interior fibers in thick-walled cables without cutting the entire jacket, ideal for heavy-duty OSP MicroCore® cables or similar.

All-in-

One Strippers: Some tools combine jacket, buffer, and coating removal in a single device, providing consistent results for splicing and terminations.

Splicing and Cleaving Tools

Fiber Cleavers: Precision cleavers are used to create clean, flat fiber ends for splicing. They are available for both single fibers and ribbon cables, with replaceable blades and scrap collectors for field use. Splicing Kits: Fusion splicers or mechanical splicing kits join fibers with minimal signal loss.

Thermal splicing tools often include dual heating modes and adjustable temperature settings for different fiber types and core counts. Crimpers and Connector Tools: Fiber crimpers are used for securing connectors such as ST, SC, LC, FC, and MTRJ. Die sets can be swapped for different connector types, and specialized insertion/extraction tools assist with high-density patch panels.

Cutting and Support Tools

Kevlar Cutters and Scissors: Designed to cut Kevlar strands, soft cable, and tape without fraying, these tools are made from high-carbon stainless steel for durability and ergonomic use. Cleaning and Testing Accessories: OTDRs, ultrasonic cleaners, and connector cleaning kits ensure fiber integrity and performance after stripping and splicing.

Key Considerations

Precision: Accurate stripping and cleaving prevent fiber damage and signal loss. Compatibility: Choose tools that match fiber diameters, buffer sizes, and cable types. Durability: High-quality materials and ergonomic designs reduce hand strain and improve efficiency.

Versatility: Multi-purpose tools save time when working with different fiber types and connectors. Investing in professional-grade fiber optic tools ensures reliable splicing, clean terminations, and long-term network performance.

The Complete Guide to Fiber Optic Tools: Splicing, Cleaving, and ...

Master your FTTx installations with Weunion''s guide to fiber optic tools. Explore high-precision strippers, cleavers, fusion splicers, and testing gear for 2026. Precision hardware for

Fiber Optic Tools: A Professional Guide to Installation,

Explore essential fiber optic tools for installation, splicing, and testing. Learn how to choose professional tools for FTTH, data centers, and

Fiber and Cable Stripper – Types, Uses & Guide

Learn how to use fiber strippers, cable cutting scissors, and armored cable slitters. Discover their applications in fiber splicing, cable prep, and FTTH.

Fiber Strippers – tools, mechanical, thermal, chemical, plasma,

Fiber strippers are precision tools that remove a coating from a fiber before connectorization or splicing. There are mechanical, thermal and non-contact strippers.

Essential Guide to Selecting Fiber Optic Splicing Tools and Kits

Cleavers, strippers, and sheath cutters are fundamental tools in any fiber optic splicing kit, each serving a distinct purpose that enhances the splicing process.

Fiber Optics Stripping, Cleaving, Splicing, Recoating,

Fiber Optics Cleaving and Stripping Tools available from StockAMS Technologies offers the full range of must-have tools for field or production – including

12 Fiber Optic Tools Every Installer Should Own – Fiber Quotes

Most splicers now have touchscreen controls, automatic heating, and splice record storage. Don''t forget to stock spare electrodes and a quality cleaver to pair with it. A must-have if

Fiber Optic Termination Tools

These fiber buffer stripping tools provide a quick, easy, and reliable way to remove the buffer from an optical fiber in preparation for connectorization. A fiber guide and matched blades ensure that the

Tutorial Passive Fiber Optics, Part 13: Fiber Accessories and Tools

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

Tutorial on passive fiber optics. Part 13 discusses fiber accessories and tools for stripping, cleaving and splicing of fibers, fiber connectors, adapters and inspection equipment.

Fiber Optic Tools Guide – Choosing the Right Tools

This article provides a complete guide on how to choose the right fiber optic tools for professional installations, analyzing categories from cutting and splicing to cleaning, inspection, and

Fiber Optic Cable Splicing: A Comprehensive Guide

Through splicing, fiber optic technicians can extend the length of the fiber to make it long enough for use in a required cable run. As fiber optic cables are generally only produced in lengths

Fiber Optic Splicing: Examining the Factors that Affect

Learn the the intrinsic and extrinsic factors that can impact fiber optic splice performance and how you can create the best fiber optic network.

Fiber Optic Pigtail: The Complete Guide to Types,

Confused about fiber optic pigtails—which connector type, which polish, fusion or mechanical splice? Our guide covers LC vs SC, APC vs UPC,

Fiber Optic Splice Closure

Discover the essential techniques for splicing fiber optic cable, including fusion splicing and mechanical splicing. Learn about fiber optic tools, connectors, and best practices for ensuring

JR-6+ Hot Jacket Stripper For Single and Ribbon Fibers

Engineered for FTTH deployment, backbone networks, and data center cabling, the JR-6+ delivers reliable, clean fiber coating removal in the most demanding field environments. With a 30% reduction

ST-F101H 2448C Fiber Optic Splice Closure

Discover the essential techniques for splicing fiber optic cable, including fusion splicing and mechanical splicing. Learn about fiber optic tools, connectors, and best practices for ensuring

Fiber Optic Cable Splicing Methods: A Practical Guide

While this guide provides a solid overview of fiber optic cable splicing, the successful execution of these methods requires extensive training, hands-on experience, and a significant
