Where can I find a fiber optic communication lab class

Overview

We provide real-world fiber optic training on the latest products and applications, ensuring you gain up-to-date, industry-specific knowledge and certifications.

Key Takeaways

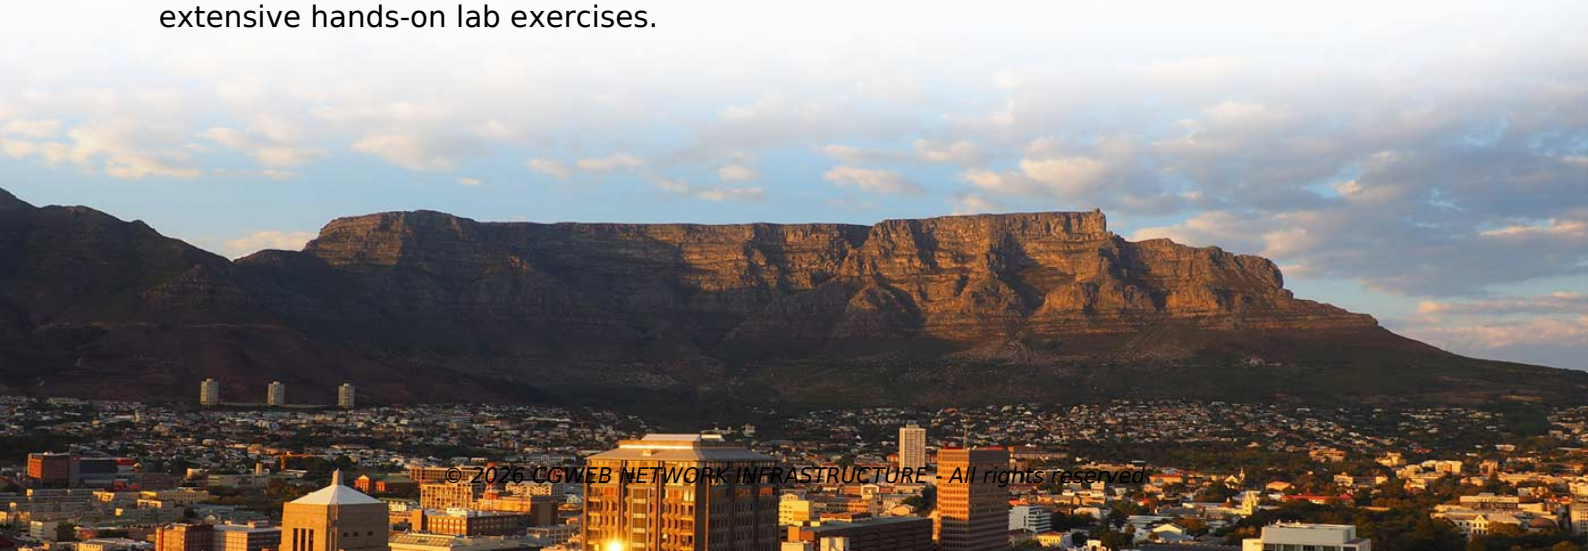

You can find hands-on fiber optic lab classes through FOA-approved schools, The Fiber School, Light Brigade, The Fiber Optic Academy, and online via Fiber U.

In-

Person Training Near Washington

Light Brigade offers certified fiber optic training in Seattle, WA, from June 2–5, 2026, including FO123 4-Day Classroom courses covering installation, splicing, and testing. They provide hands-on instruction with industry-standard equipment and certifications. The Fiber School provides nationwide in-person courses for all skill levels, from beginner to advanced, with hands-on labs and optional custom courses.

The Fiber Optic Academy offers FOA-approved in-person courses such as CFOT (Certified Fiber Optic Technician), CFOS/S (Splicing), and CFOS/T (Testing) with extensive hands-on lab exercises.

Online and Self-

Study Options

Fiber U provides free online self-study courses and virtual fiber optic skills labs, including cable preparation, splicing, termination, and testing. These can supplement in-person training or prepare you for FOA certifications.

Comm

Scope Infrastructure Academy offers online fiber optic courses covering installation, testing, and network design, suitable for beginners and experienced technicians. Class Central lists over 100 online fiber optics courses, including practical tutorials and theoretical foundations from platforms like Udemy, edX, and YouTube. FOA-Approved ProgramsThe Fiber Optic Association (FOA) maintains a database of approved schools offering CFOT and specialist certifications.

These programs include hands-on lab exercises and cover installation, splicing, testing, and network operation. How to Choose a ClassSkill Level: Beginners should start with CFOT or basic fiber optics courses; advanced technicians can pursue CFOS/S, CFOS/T, or specialized labs. Format: Decide between in-person labs for hands-on experience or online/self-study for flexible learning.

Certification: FOA-approved programs provide recognized certifications that enhance employability. Location: For Moses Lake, WA, consider nearby Seattle or Portland classes, or online options if travel is difficult. By combining in-person labs with online self-study, you can gain both practical skills and theoretical knowledge to become a certified fiber optic technician.
